RESEARCH FOCUS

I study how ecological and evolutionary forces shape variation in plant traits — especially seed dispersal — across organizational and spatial scales. A recurring role in my work is that of the **integrative quantitative analyst** on large, multi-year projects: I synthesize data generated by multiple students across distinct sub-studies into unified hierarchical, cross-scale analyses, supported by custom analytics dashboards. This integrative approach spans the multi-chapter dispersal-trait project with PhD student M. García Serrano, the Asiatic wild-ass ecology project, and my own doctoral research.

EDUCATION

Ph.D., Desert Studies / Ecology 2016–2021

Albert Katz School for Desert Studies, Mitrani Dept. of Desert Ecology, Ben-Gurion University (BGU)

Thesis: *The interactive effects of genetic relatedness and selection pressures on seed dispersal distances in an annual plant*. Supervisors: Prof. Itamar Giladi & Prof. Ofer Ovadia.

M.Sc., Desert Ecology — Cum Laude 2014–2016

Albert Katz School for Desert Studies, BGU

Thesis: *The effect of pollen source on dispersal-related traits in a heterocarpic annual plant*.

Supervisors: Dr. Itamar Giladi & Dr. Hagai Shemesh.

B.Sc., Environmental Sciences 2010–2014

Tel-Hai Academic College

Research project: *The effect of temporally variable nutrient regimes on habitat selection in an annual plant*. Supervisor: Dr. Hagai Shemesh.

ACADEMIC APPOINTMENTS

Postdoctoral Researcher — Ben-Gurion University 2022–present

Spatial Plant Ecology Lab (Prof. Itamar Giladi) — intraspecific trait variation, dispersal ecology, hierarchical & variance-partitioning modeling. Plant Communities & Complex Systems Lab (Prof. Merav Seifan) — plant–pollinator interactions, drought effects on plant fitness.

Postdoctoral Researcher — Tel-Aviv University 2021

Lab of Prof. Itay Mayrose — effects of genomic duplication (polyploidy) on plant–pollinator interactions and ecological-network structure (phylogenetic comparative methods, network theory). Collaboration with Prof. Tia-Lynn Ashman (Univ. of Pittsburgh).

PUBLICATIONS

RESEARCH IN THE MEDIA

Dener et al. (2016), "Pea plants show risk sensitivity," Current Biology — covered by 20+ international outlets following Oxford and Cell Press releases, including **Science/AAAS**, *Newsweek*, *Christian Science Monitor*, *The Daily Beast*, *The Scientist*, IFLScience, Modern Farmer, UPI, Phys.org, ScienceDaily; German outlets *wissenschaft.de* and *scinexx.de*; and the Hebrew **Davidson Institute** (Weizmann). Discussed in a *Current Biology* Dispatch commentary, "Decision-Making: Are Plants More Rational than Animals?" (2016).

RESEARCH FUNDING & GRANT CONTRIBUTIONS

2020	ISF Grant 2684/20 (contributing author) — "Levels of intraspecific variation in dispersal traits and their potential consequences" (PI: Prof. I. Giladi). ~848,000 NIS / 4 yrs. Created proposal figures and contributed written feedback across drafts. Funds the co-supervised PhD project.
2024	ISF Grant 2886/25 (contributing collaborator) — "Dust devils as a mechanism of secondary seed dispersal in drylands" (PI: Prof. I. Giladi). Proposal design, graphics, methods information.
2014	The Sol Leshin Grant — 87,000 NIS. Co-initiated, developed and co-wrote (with Dr. I. Giladi & Dr. H. Shemesh).

AWARDS & HONORS

2021	Publication Prize ×2 (for <i>Dener et al.</i> , <i>J. Plant Ecology</i> ; and <i>Cna'ani & Dener et al.</i> , <i>Plant, Cell & Environment</i>) — Albert Katz Int'l School for Desert Studies, BGU
2021	Postdoctoral Matching Scholarship — Tel-Aviv University
2018	Second-Best Student Presentation Award — 31st GfÖ Plant Population Biology Conference
2016–2020	The Negev (Faran) Scholarship for Outstanding Doctoral Students — BGU
2016	Best Student Presentation Award — 29th GfÖ Plant Population Biology Conference
2016	The Merav Ziv Award for Outstanding Achievement in Ecology (M.Sc.) — BGU
2016	"Recognition of Excellence" Prize; Dean's Award (Certificate of Merit) — Albert Katz Int'l School, BGU
2015–2016	Full M.Sc. Scholarship — Albert Katz School for Desert Studies, BGU

CONFERENCE PRESENTATIONS

2025	Multi-level variation in dispersal traits along a precipitation gradient — PopBio Annual Conference (Poster)
2020	Effect of habitat fragmentation on seed dispersal ability of a wind-dispersed annual — 4th NSO / Oikos Conference, Reykjavik (Poster)
2019	Evolution of dispersal kernels under anthropogenic fragmentation — 4th Plant Ecology in Israel, Tel-Hai (Oral)
2018	Dispersal in fragmented habitats — 3rd Plant Ecology in Israel, Tel-Aviv Univ. (Oral); & 31st GfÖ Conf., Innsbruck (Oral)

2016	Long-distance pollination results in short-distance seed dispersal — 29th GfÖ Conf., Czech Rep. (Oral); 17th Sede Boqer Symposium (Oral); 1st Plant Ecology in Israel (Oral)
2015	The effect of pollen source on dispersal-related traits — Israeli Society of Ecology & Environmental Science, Hebrew Univ. (Oral)
2014	Beyond average: temporally variable nutrient regimes and habitat selection — ISEES, Bar-Ilan Univ. (Oral)

TEACHING EXPERIENCE

Lecturer (Instructor of Record) — Tel-Hai Academic College

2020–2022	Statistics for Biologists / Biostatistics (Biotechnology & Water Science)
2020–2021	Ecological Tracking as a Research Tool (Environmental Sciences)
2021–2022	Research Methods B (Environmental Sciences)
2022	First Seminar (Environmental Sciences) — co-taught

Teaching Assistant / Guest Lecturer — Ben-Gurion University

2022–pres.	Data Visualization module, Biostatistics course (guest sessions)
2019–2021	The World of Plants (Life Sciences Dept.)
2017–2019	Biophysical Field Methods in the Namib Desert — international course, Gobabeb, Namibia (in English)
2020	Biostatistics & Experimental Design, Albert Katz Int'l School (in English)

MENTORING & STUDENT SUPERVISION

2022–pres.	Manuel Jesús García Serrano — Ph.D. (BGU) — co-supervisor with Prof. Giladi
2023–2026	Ibrahim Salman — Ph.D. (BGU) — statistical & manuscript mentor; co-author
2024–2026	Hemanth Akallasandra Yoganan — M.Sc. (BGU) — statistical analysis & supervision
2026	Sanjana Sarode — M.Sc. — thesis mentoring
2026	Nuribat Cohen & Efrat Levi — seminar students (BGU, Seifan group) — co-mentor
2023–2026	Yael Avidan — collaborator/mentee — vegetation data analysis & modeling
2021	Paula Schreiner — B.Sc. thesis, Univ. Tübingen — experimental-design advisor

PROFESSIONAL SERVICE & OUTREACH

Statistical consulting & collaboration (2017–present). Provide study-design, mixed/hierarchical-model, SEM and data-analysis support to 20+ research groups across ecology, conservation and the life sciences. Several collaborations have produced co-authored publications — including with the labs of **Prof. Tamir Klein** (Weizmann Institute), **Prof. Merav Seifan** (BGU) and **Dr. Liora Shaltiel-Harpaz** (MIGAL / Tel-Hai). Paid statistical consulting for the labs of **Prof. Oded Berger-Tal** and **Prof. Carmi Korine** (BGU) and for organizations including the Jewish National Fund (KKL).

Field surveys. Annual monitoring of protected wildflowers — *Iris atropurpurea* (Royal Iris) and *Paeonia* (Forest Peony), Upper Galilee — organized by Dr. Hagai Shemesh (2018, 2021, 2023, 2025, 2026).

AI & computational tools in education. Built interactive simulations of classical ecological models for Prof. Seifan's Community Ecology course; a ChatGPT-based botanical-identification tool for Prof. Giladi's courses (2025); contributing to AI integration in the new international B.Sc. in Renewable Natural Resources, Sde Boker (2026).

Committees & service. Organizing committee, SIDEER symposia, BGU (2018–2020); Academic Committee, Student Council, Sde Boker (2016–2020); session moderator, BGU student conference (2025); curriculum design, new B.Sc. in Bio-Data / Computational Biology, Tel-Hai (2021).

Public outreach. "Introduction to Science" with high-school students (2019–2020); ecology education with elementary-school children (2018).

TECHNICAL & COMPUTATIONAL SKILLS

Statistical modeling. LM/GLM/LMM/GLMM; variance partitioning & hierarchical models and SEM / path analysis (*specialties*); bootstrap & resampling; phylogenetic comparative methods (PGLS, phylogenetic path analysis); multivariate ordination (PCA, NMDS, cluster); spatial & time-series analysis; simulation / individual-based modeling; experimental design.

Programming & reproducibility. R / RStudio (advanced — Shiny, R Markdown / Quarto); Python (data pipelines); NetLogo; Matlab; Git version control. SPSS, JMP/Jamovi, AMOS, Tableau.

GIS & imaging. QGIS, ArcMap; ImageJ (morphological trait quantification).

Field & laboratory. Designed and ran large-scale common-garden (net-house) experiments and multi-year seed-collection field campaigns on the heterocarpic annual *Crepis sancta* (MSc & PhD) — ~1,440 seeds / ~760 plants from 180 field-monitored maternal plants across 4 populations, two irrigation regimes; permanent 50×100 m plots; trait variance partitioned across four nested scales (population → mother → fruit → seed). Also: multi-year arid/Mediterranean vegetation & trait surveys; controlled pollination & wind-dispersal experiments; molecular-biology & analytic-chemistry methods.

Research software development. Designed and built **multiple multi-module R Shiny dashboards** for integrating, exploring and visualizing large multi-source datasets (each with an automated data pipeline and test suite), a Python data-processing pipeline with API integration, and an iOS (Swift) app. Demonstrates end-to-end research-software capability: reproducible workflows, automated pipelines, interactive analytics, and version control across complete projects.

ADDITIONAL TRAINING

2018	Research visit (~1 month), lab of Dr. Pierre-Olivier Cheptou, CEFÉ Montpellier, France (<i>Crepis sancta</i> population genetics)
2017	Agent-Based Modelling with NetLogo (Univ. of Göttingen); Quantitative Methods in Ecology — advanced multivariate statistics (BGU)
2015	Biostatistics: ANOVA & Design of Experiments (BGU)
